

Thematic Area	Title
Crop production	Improved cultivation practices of hybrid maize
Weed Management	Weed management of some important field crops
Post Harvest Technology	Scientific procedures of retting of jute fibre for improving fibre quality
Resource Conservation Technologies	Use of SRI technique in boro paddy under irrigated situation
Post Harvest Technology	Techniques of retting of jute fibre by ribbon retter
Seed production	Seed production procedure for village seed production
(Others, if any) Scientific management practice	Improved cultivation practices of groundnut with special reference to fertilizer and irrigation management
Crop Diversification	Improved cultivation practices of green gram
Fodder production	Cultivation techniques of some important fodder crops
(Others, if any) Scientific management practice	Improved cultivation techniques of mustard with special reference to sulphur and micronutrient management
Production and Management technology	Improved cultivation practices of Ridge gourd
Crop diversification	Intercropping and management practices of elephant foot yam
Crop diversification	Scientific cultivation practices of tuberose.
Production and Management technology	Scientific cultivation practices of major cucurbits of Howrah district
Plant propagation techniques	Propagation techniques and management of mango.
Production and Management technology	Improved cultivation practices of short duration leafy vegetables
Production and Management technology	Improved cultivation practices of Cole crops (cauliflower and cabbage)
Management of field plants	Scientific cultivation practices of major flowers of Howrah district
Production and Management technology	Effect of growth regulator on different cucurbitaceous crops
Integrated Pest Management	Insect pests of ridge gourd and their integrated management
Integrated Pest Management	Pests of cucurbits and their integrated management
Integrated Pest Management	Integrated pest management of boro paddy
Integrated Pest Management	Protection measures against major pests of cole crops through IPM
Integrated Disease Management	Integrated management of late blight disease of potato
Integrated Disease Management	Integrated disease management against diseases of elephant foot yam
Others, if any (Insect and disease pest identification and management)	Scientific management practices against insect and disease pests of sesame
Others, if any (Insect and disease pest identification and management)	Identification and scientific management practices against insect and disease pests of groundnut
Others, if any (Insect and disease	Scientific management practices against pests of green gram

pest identification and management)	
Others, if any (Insect and disease pest identification and management)	Pest complex scenario of mustard with special reference to its management practices
Soil and Water Testing	Techniques of soil sample collection and preparation for soil analysis
Micro nutrient deficiency in crops	Classification, importance, principle of recommendation and deficiency symptoms of different nutrient elements in crop production
Micro nutrient deficiency in crops	Importance ,functions and role of micronutrient in crop production
Integrated Nutrient Management	Integrated nutrient management of rice cultivation
Production and use of organic inputs	Importance and management of agricultural waste for crop production
Integrated Nutrient Management	Integrated nutrient management of oil seed crops
Soil fertility management	Soil health management techniques
Poultry Management	<i>Khaki Campbell</i> duck rearing and its management
Poultry Management	RIR chicken rearing and its management
Others, if any (Goat farming)	Black Bengal goat rearing and its feeding & health care management
Poultry Management	Prospect of Quail rearing and its management
Group dynamics	Farmers' Club: Its importance in modern agriculture
Group dynamics	Joint Liabilities Group formation: Basic concepts and application
